

2017

Accredited Skill Acquisition Program (SAP)

Galaxy United FC (GUFC), Geelong Region and Victoria's only regional WNPL club, wish to invite all interested girls born between 2006 – 2009 to trial for a place in our fully accredited FFA SAP program which will commence during the week of 17 April 2017.

The SAP is a concentrated skill acquisition program that designed to perfect and accelerate the four core skills development of both Boys and Girls at the critical ages of 9 to 13

- ***First Touch***
- ***1 v 1 attacking/defending***
- ***Running with the ball***
- ***Striking the ball***

Under the guidance of qualified SAP instructors, players will attend two sessions per week over 24 weeks that are well planned and geared towards to improving technique in the four core skills. All sessions are highly challenging and fun based. Also players in the program will receive a training kit and the opportunity to participate in three weekend SAP Gala Days to be played against other accredited SAP programs from around the state.

Galaxy United FC are fully motivated and experienced in developing talented female players from our region and in conjunction with their community club, ensure that talented players within our region have a meaningful future pathway to representative football through the WNPL/FFV Talented Player and state programs /W -League and our national teams.

How it works:

Players will still need to be registered to play with their community clubs in their hubs. GUFC will hold two compulsory sessions per week (Mon, Wed & Fri) over three 8 week cycles and recommend that the player will train once per week with their community club and play with them on weekends.

The program cost for interested players will be \$480 for 48 sessions (\$10 per session)

All interested players wishing to join the Galaxy United FC program are invited to come along to a free introductory session to be held on Wednesday 12 April from 5pm to 6.15pm at Evans Reserve, Sparks Rd in Norlane. We do request that players register their interest via the following link:
